CUMULATIVE INDEX TO NURSING LITERATURE

1974

PREFACE

The first four editions of NURSING SUBJECT HEADINGS were published separately. This subject authority list has been included as part of the annual cumulation since 1971. It is a guide to the use of nursing subject headings as used in the CUMULATIVE INDEX TO NURSING LITERATURE. A listing of the new headings which have been introduced with this 1974 revision and the headings under which material on these subjects was formerly indexed is included.

This list follows the form adopted by the Library of Congress and uses the same symbols, e.g.,

- sa indicates a see also reference
- x indicates a refer from a see reference
- xx indicates a refer from a see also reference

See references (x) refer from terms not used to those used. These references appear in alphabetical order, but are in lower case, e.g.,

Adenoids See: TONSILS AND ADENOIDS

In other words, every heading in the list that is used or is a "good" term is in full capitals. Conversely, if a term is not in full capitals, then it is not a heading used for a subject entry.

See also references (sa) usually refer from a more general term to a more specific term, e.g.,

ANEURYSM
sa AORTIC ANEURYSM

A refer from see also reference (xx) indicates that a see also reference (sa) has been made from the more general to the more specific term, e.g.,

AORTIC ANEURYSM
xx ANEURYSM

Where terms are of more or less equal value both see also (sa) and refer from see also (xx) references may appear, e.g.,

FATIGUE
sa REST
xx REST
REST
sa FATIGUE
xx FATIGUE

Cf following a term precedes all other cross references and suggests the consideration of another term not closely related, e.g.,

GROUP WORK
cf TEAMWORK

Subdivisions of a subject are indented and preceded by a dash (--), e.g.,

NURSING EDUCATION
--ADMINISTRATION
--ASSOCIATE DEGREE PROGRAMS

Where pertinent certain subject headings are divided geographically, i.e.,

NATIONAL HEALTH PROGRAMS
--AUSTRALIA
--GREAT BRITAIN, etc.

The following subdivisions may be used.

ANALYSIS
with any substance or its constituents for identification
or quantitative determination
ANATOMY
with any subject which is a part of the body
BIBLIOGRAPHY
with any subject when pertinent
DIAGNOSIS
with any subject which is the name of a disease, condition
or injury
DISEASES
with any subject when pertinent
DRUG THERAPY
with any subject which is the name of a disease, condition
or injury for therapeutic action or prevention
EDUCATION
with any subject when pertinent
EVALUATION
with any subject when pertinent
HISTORY
with any subject when pertinent
IN INFANCY AND CHILDHOOD
with any subject when pertinent
INJURIES
with any subject which is a part of the body to identify
traumatic wounds and injuries
NEOPLASMS
with any subject which is a part of the body
ORTHOPEDICS
with any subject which is a part of the body
PHYSIOLOGY
with any subject which is a part of the body
PROCEDURES AND TECHNIQUES
with any specific clinical subject
STANDARDS
with any subject when pertinent
STATISTICS
with any subject when pertinent
SURGERY
with any subject when pertinent

Inverted headings are not indented but the inversion is indicated with a comma. Inverted headings file after the subdivisions, e.g.,

COLD--PHYSIOLOGICAL EFFECT
Cold, Common See: COMMON COLD

Classes of Headings omitted from the List for which the Indexer supplies specific names as needed:

Names of persons

Names of places (Geographical headings)

Names of National and International Organizations

Scope notes indicate the range of subject matter to which a heading is applied in CINL. For an example of this, see under the heading NURSING.

The editors gratefully acknowledge the assistance received from the use of other existing subject heading lists, namely:
